I'm a C# programmer and asp.net core developer. I know several other languages such as python, JavaScript, typescript and C++, but I've worked with C# the longest.

EXPERIENCE

BACK-END WEB DEVELOPER, CURRENTLY SELF-EMPLOYED

I started programming with C# around 6 years ago, and my interest in back-end web development started around 1 to 2 years ago. I've been making personal projects ever since.

EDUCATION

UNDERGRADUATE IN PURE MATHEMATICS, ISFAHAN UNIVERSITY

I'm currently studying pure mathematics at Isfahan University and continuing to learn programming on my own

SKILLS

- SOLID principles
- GoF Patterns
- Asynchronous programming and Parallel programming with C#
- Creating windows applications with Windows Form
- Version control with git
- Unit testing using xUnit and Moq

- Python and graphing data
- C# Programming Language
- Backend with Asp.net core (MVC & Razor Pages)
- CSS, HTML, JavaScript and typescript
- SQL server and Entity Framework Core
- Asp.net core Identity
- Rest API

ACTIVITIES

I love mathematics and playing chess. I know English and I can read English documents with ease. I started programming in middle school and ended up liking the language C# a lot. I also use python for plotting graphs and making animations for mathematical transformations.
